Week 1

September 10 2019

Multiple tools are available across the design digital ecosystem.

Within the context of this class, students should pick a tooling strategy early on.

This choice should be chosen according to each student's preferences.

This choice should be justified according to each student's preferences.

Thus, it is mandatory for every student to perform an initial test with each tooling choice before the creation of digital wireframes.

Requirements

- _ Wireframes
- _ High Fidelity Mocks
- _ UI Component Library
- _ Design System Catalog
- _ Interactive prototype (external link)
- _ UI Animations

Option 1

— Adobe XD

Free

Suited for...

students who do not want to manage multiple applications at the same time. Adobe XD allows for multiple creation purposes such as wireframes, prototype and animations. The software is also free to use.

Option 2

Figma

Free

Principle

50% OFF

Suite for...

students who want to go deeper into UI Animations and also learn a new promising and solid industry-standard tool: Figma.

Option 3

Sketch

50% OFF

Craft

Free

InVision

Free

Principle

50% OFF

Suited for...

students who already have a Sketch software licence and are comfortable with managing multiple software applications.

“But, I want to do my design on Photoshop or Illustrator.” - Student A

Please, just don't ;)
